THE DEPUTIES OF THE STATES OF GUERNSEY

Dear Members of the States

Attached to this letter is a Report. The purpose of the Report is to address the overall strategies which the Waste Disposal Authority of the Public Services Department may bring forward to you, perhaps within six months of this date.

The Report is designed not to pre-empt their conclusions, but to demonstrate that alternatives to Mass Burn Incineration are both practicable and cost-effective.

The title of the Report “Excellence in Waste” was chosen to underline the merits of treating Guernsey’s solid waste not as a problem, but as a resource.

I hope that the Report, which is necessarily brief, demonstrates that, far from there being no realistic alternatives to Mass Burn Incineration, the path upon which you decided, in your Resolution of 26 February 2010, is well proven elsewhere and less expensive.

Please address any responses to me at the above email address.

Yours sincerely

Roger Dadd
